**Steven De Coninck, MSc, PT**, is a senior teacher of the European Teaching Group of Orthopaedic Medicine (ETGOM) and presents OMCyriax courses all over the world. He has a private practice in Belgium, has published several books and video productions and created the first standardized Cyriax Assessment Forms. Constantly innovating, updating and spreading the real basic value of OMCyriax is his mission. For more information go to: [www.om-cyriax.com](http://www.om-cyriax.com)

**optp exclusive Orthopedic Medicine Cyriax: Updated Value in Daily Practice** These two volumes present the true 'updated Cyriax Method' by closely adhering to OMCyriax values. These texts detail the importance of diagnosis through the use of a practical, standardized examination protocol (as presented in Cyriax Assessment Forms). Specifically designed for the field therapist, all treatment techniques are covered in a practical way and include problem solving tips. Illustrated. Softcover, 283 pages.

Part 1: *Clinical Examination and Diagnosis* covers basic and accessory examination as well as treatment options for the extremities and spine (#8791) .....\$44.95

Part 2: *Treatment by Deep Transverse Massage, Mobilization, Manipulation and Traction* covers friction massage, manipulation, mobilization and traction as well as treatment strategies for the extremities and spine (#8792) .....\$29.95

*"The MyoTool is an easy and affordable way to help patients self-mobilize and stretch, particularly difficult to access regions such as the spine where self segmental mobilization is almost impossible."*

—Jenny McConnell, PT, M. Biomed. Eng., GDMT

**MyoTool**

The MyoTool provides over 30 self treatment options such as joint mobilization, stretching, pump massage, trigger point massage, neuromuscular facilitation and neural gliding. Under the guidance of a health care practitioner, the center knobs of the MyoTool can be used in both standing and supine positions to perform thoracic mobilizations.
