

**Olaf Evjenth PT, OMT** is an internationally acclaimed Professor of manual therapy, a Norwegian physiotherapist recognized worldwide as a progenitor of modern manual therapy and exercise rehab. Together with Professor Kaltenborn, he co-developed the OMT Kaltenborn-Evjenth System, which helped form the standards of the International Federation of Manipulative Therapists (IFOMT). An author of note, he has written a number of books on muscle stretching, manual therapy and exercise rehabilitation. Professor Evjenth continues to make significant contributions to manual therapy, developing new techniques for evaluation, mobilization, manipulation and rehabilitation.

**optp exclusive** **Symptom Localization in the Spine and the Extremity Joints**

This unique guide for localizing the origins of symptoms in the local-motor system, through the use of special tests, can be used for those beginning manual therapy as well as experienced practitioners. Written by Evjenth and Gloeck. Illustrated. Booklet, 40 pages. Non-returnable.

*Symptom Localization in the Spine and the Extremity Joints* (#8675) .....**\$20.95**

**optp exclusive** **Original Norsk Mobilization Wedge**

Designed to accommodate the spinous process with sufficient space to facilitate palpation of movement this wedge is 9" x 4" at its base and is ideal for in-clinic or at-home use. While small enough to be placed between the shoulder blades, a contoured non-slip base offers sufficient stability as a treatment base. For added comfort, the wedge features rounded corners.

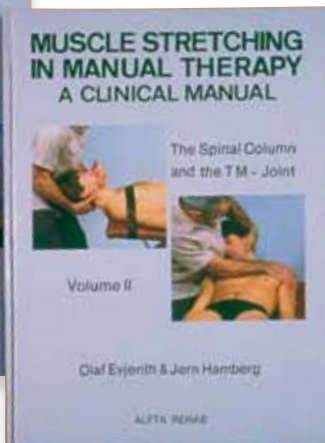

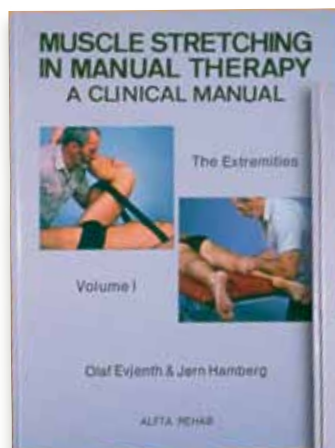

Original Norsk Mobilization Wedge (#611) .....**\$27.95**

**optp exclusive** **Symptom Provocation and Alleviation Tests**

Now available on DVD, Olaf Evjenth and Roar Robinson introduce clinical diagnostics using the principles of provocation and alleviation testing to determine the borderline of pain. Employing both tests prior to instrumental testing leads to greater cost-effectiveness and spares the patient from unnecessary testing. The DVD set covers the upper and lower extremity, sacroiliac, lumbar, cervical and thoracic spine. Approximately 60 minutes each. Non-returnable.

*Symptom Provocation and Alleviation Tests* DVD set (#926DVD) ..... **\$79.95**

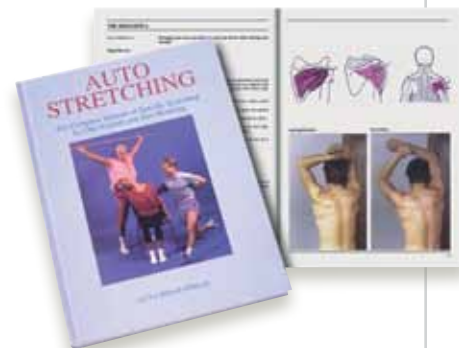

**Muscle Stretching in Manual Therapy Vol I & II**

Volume I covers general principles of manual therapy and techniques for upper and lower extremities. Volume II offers a therapeutic overview of the spinal column and the T-M joint, including movement patterns, the movements involved in the locking techniques and other therapy techniques. By Olaf Evjenth and Jern Hamberg. Illustrated. Hardcover.

*Muscle Stretching in Manual Therapy Volume I: The Extremities*, 176 pages (#8204).....**\$57.00** \$45.60 (12+)

*Muscle Stretching in Manual Therapy Volume II: The Spinal Column and the T-M Joint*, 147 pages (#8206) .....**\$57.00** \$45.60 (12+)

**AUTO STRETCHING**

Written by Olaf Evjenth and Jern Hamberg this book is presented as both a self-stretching guide and reference text. These exercises are described in detail for most muscle groups. Color photos and anatomical sketches accompany each stretch. Hardcover, 248 pages.

*AUTO STRETCHING* (#8220) ..... **\$39.95** \$28.00 (12+)
