

SPIDERTECH™

SpiderTech™ Training Starter Kit

new!

SpiderTech™ Tape

SpiderTech™ tape was developed to facilitate a functional medicine approach to pain modulation and myofascial dysfunction. This exclusively engineered Kinesiology taping application provides health care professionals an effective, easy to use treatment option to enhance patients' performance by helping to reduce swelling and pain and also prevent future injury.

SpiderTech enables your patient to both regain pain-free mobility and resume their training regimen with:

- Early engagement in ranges of motion and strengthening exercises
- Active participation in their therapeutic process
- Management of their treatment objectives between treatments, by taking the therapy home with them

Developed to mimic the thickness, weight and elasticity of human skin, SpiderTech tape naturally integrates with the body's sensory system, promoting positive physiotherapeutic results. SpiderTech tape comes in roll form and also in 16 pre-cut, pre-designed, pre-packaged applications. Made of high-grade cotton material with 100% acrylic, hypoallergenic adhesive, this tape is water-resistant, breathable and may be worn for up to five days.

Description	Item No.	Price
SpiderTech Training Starter Kit	Black #5800BK.....	\$148.50
