

OPTP is proud to be voted the #1 website from Onward Healthcare!

51 PHYSICAL THERAPY RESOURCES

The 51 Physical Therapy Resources page was built as a reference guide for physical therapy professionals and physical therapy job seekers. The following list of physical therapy links were broken down into eight categories and voted on by members of the Onward Healthcare staff with the help of our physical therapists.

When selecting our top 51 Physical Therapy Resources, we tried to pick those sites that would be most useful to physical therapists, physical therapy assistants, travel physical therapists, physical therapy job seekers and physical therapy students. The links range from physical therapy informational sites, to PT blogs and social media sites, as well as national organizations and sections of the APTA.

Here are some winners:

Physical Therapy Products

Orthopedic Physical Therapy Products provides healthcare and fitness professionals with orthopedic, physical therapy, rehabilitation and fitness products.

Physical Therapy Resources

The American Physical Therapy Association is the principal organization representing and promoting the profession of physical therapy.

Physical Therapy Interactive Tools

PhysioTools is an online software application designed to make the process of prescribing personalized exercise regimes quick and easy.
